Trikka

**2-in-1 training clicker
and treat dispenser**

A training clicker is a reward-based method of training your dog.

When the dog has performed correctly, an immediate “click”, followed by a treat, means the dog can associate correct behavior with a reward.

Patent pending No. 1615786.9

The Trikka 2-in-one trainer allows you to click and dispense one treat at a time.

The dual button system - one for a click, one for a treat - also allows you to perform both functions independently, while one push of the Trikka double button provides a high quality click sound along with an instant training treat.

The body of the Trikka is made from durable polypropylene, while the clicker element has been specially designed for the Trikka case and is of the highest quality in terms of both sound and strength.

The Trikka comes complete with a training instruction leaflet and 30g of Trikka training treats - delicious all-natural treats made with fine quality ingredients for a healthy snack reward!

at least 42% meat!

Trikka

100% Natural Dog Training Treats

Chicken

and Sweet Potato

250g e

Hypo-allergenic and grain free
training treats containing
at least 42% meat!

Trikka Treats use 100% natural ingredients with high quality meat and natural sources of fibre. Gluten-free wheat also makes them hypo-allergenic, so even the most sensitive dogs can enjoy them!

All Trikka treats have a high meat content (over 42%), with both fresh and dehydrated meat or fish.

Sweet potato is easily digestible source of slow-release energy with a high concentration of antioxidants. It is also a great source of soluble fibre and is the main source of carbohydrates.

Along with other selected vegetables needed to maintain a healthy balanced diet, glucosamine and chondroitin is added to aid joints and help prevent osteoarthritis.

A unique blend of herbs including parsley, thyme, rubbed mint and green tea are included to aid in digestion.

On the right is the full list of ingredients for both our Salmon and Chicken treats.

Trikka
