

HAPPY PET PROJECT

FOUNDED BY magisso

*We believe every product made for pets
should be designed as well and profoundly
as products for human beings.*

*We are dedicated to re-invent important
daily moments in your pets life.*

Why Happy? Why Project?

Happy Pet Project is a brand founded in 2018 by the awarded Finnish design lab Magisso.

Happy Pet Project is a project with a beginning and an end. Our job is done when all the pets in the world are truly happy.

Happy Pet Project is committed to support the pets' rights for better living.

Where are we coming from?

Magisso is a team of 10 design geeks obsessed with creating meaningful, function-driven design products that solve everyday life problems at home.

Magisso has a background of being one of the most awarded young design companies in the Nordics with over 30 international design awards.

Now we are fixing the life and problems of pets and pet parents. We call it the **Happy Pet Project**.

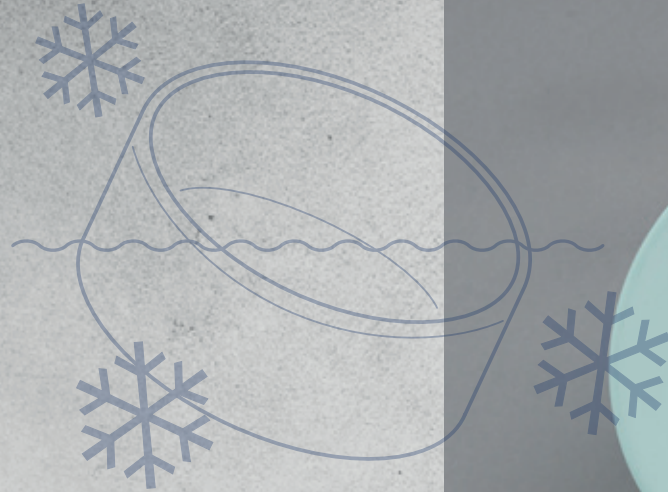

Happy Pet Project is dedicated to bring functional, aesthetically pleasing selection of objects which help pets to stay healthy and help pet parents to show their love and support to their companion animals.

Pet-essentials – our awarded collection

Happy Pet Project creates beautiful designer products to ensure pets' and pet parents' health and happiness.

Our unique products combine smart functionalism and classic Nordic design aesthetics to match modern living standards.

Always fresh and cool water

Happy Pet Project bowls made of unique Cooling Ceramics material keep food fresh and water cool through the whole day.

Cool water reduces bacterial contamination.

Fresh water encourages the pet to stay hydrated – and healthy.

To cool the bowl soak it with normal tap water for 45 sec. The bowl will turn cold for hours and keep the content fresh.

**“For dogs who gulp
their food down, causing
gastrointestinal distress,
Happy Pet Project bowl
IS A MUST HAVE.”**

Animal Medical Center, New York

Healthy dining

The smart 3D obstacle in the bowls slows the ingestion of food – the pet swallows less air. This lessens the chance of gastric issues.

New Colors!

In 2018 Happy Pet Project is introducing vibrant new colours to fit any modern home. Tasty Tangerine and cool Concrete are the latest color swatches on our Cooling Ceramics collection.

Designer collection

Artistic and affordable Cubist pet bowls.
Increased weight for maximum stability.
With or without slow feeding element.
Design by Stella Haponen.

Only fresh treats for your pet

Treats served to pets today are mostly natural and or organic and they expire fast.

Happy Pet Project Treat Jar lid is sealed to keep the content fresh and the scent of the treat inside the jar.
